Safe Mobility: Challenges, Methodology and Solutions

Chapter 1. Introduction
Dominique Lord, Texas A&M University, USA
Simon Washington, University of Queensland, Australia

Driver Behaviour: Challenges and Solutions

Chapter 2. Driver Education and Licensing Programs
Lyndel Bates, Griffith Criminology Institute at Griffith University, Australia
Ashleigh Filtness, Loughborough University, Australia
Barry Watson, Queensland University of Technology (QUT), Australia

Chapter 3. Aggressive driving and speeding
Kara Kockelman, University of Texas – Austin, USA
Jianming Ma, Texas Department of Transportation, USA

Chapter 4. Distracted Driving and Inattention
Mitchell Cunningham, Australian Road Research Board, Australia
Michael Regan, Australian Road Research Board, Australia

Transport Network: Challenges and Solutions

Chapter 5. Urban and Suburban Arterials
Tom Brijs, Hasselt University, Belgium
Ali Pirdavani, Hasselt University, Belgium

Chapter 6. Controlled access facilities (freeways)
Francesca La Torre, University of Florence, Italy

Chapter 7. Rural and Urban Intersections
Richard Tay, RMIT University, Australia

Chapter 8. Roundabouts
Alfonso Montella, University of Naples Federico II, Italy

Chapter 9. Real time traffic safety and operations
Mohamed Abdel-Aty, University of Central Florida, USA
Qi Shi, Research Institute of Highway (RIOH), Ministry of Transport (MOT), China
Anurag Pande, Cal Poly State University, USA
Rongjie Yu, Tongji University, China
Vulnerable Road Users: Challenges and Solutions

Chapter 10. Providing for Pedestrians
Per Gårder, University of Maine, USA

Chapter 11. Providing for Bicyclists
Narelle Haworth, Centre for Accident Research and Road Safety-Queensland, Australia
Jacqueline Fuller, Queensland Government, Australia

Methods for Understanding and Predicting Safety Performance

Chapter 12. Cross-Sectional Modelling
Fred Mannering, University of South Florida, USA

Chapter 13. Time-Series Modelling
Mohammed Quddus, Loughborough University, UK

Dominique Lord, Texas A&M University, USA
Srinivas Geedipally, Texas A&M Transportation Institute, USA

Chapter 15. Crash Severity Methods
John Ivan, University of Connecticut, USA
Karthik C. Konduri, University of Connecticut, USA

Chapter 16. Detecting high risk accident locations
Simon Washington, University of Queensland, Australia
Amir Pooyan Afghari, University of Queensland, Australia
MD Mazharul Haque, Queensland University of Technology, Australia

Chapter 17. Surrogate Measures of Safety
Andrew Tarko, Purdue University, USA

Methods for Evaluating Safety Impacts of Countermeasures

Chapter 18. Before-after Evaluations
Bhagwant Persaud, Ryerson University, Canada

Chapter 19. Meta Analytic Methods
Rune Elvik, Norwegian Centre for Transport Research, Norway

Summary and Conclusions

Chapter 20. Conclusions and Future Directions
Dominique Lord, Texas A&M University, USA
Simon Washington, University of Queensland, Australia
