Your term project will involve the analysis and critique of a journal publication. The actual publication is up to you but:

a) It should encompass the topics discussed in this course, at least tangentially
b) You must send me a reference to the paper so that I can decide if it is suitable (I plan on being fairly liberal with this but I would like to see what you have in mind.)

While I don’t want to impose a deadline for letting me know which paper you choose to discuss, I would suggest that you let me know as soon as you have decided.

Assignment Parameters:

1) The paper should be 5-7 pages. More pages are fine, but too many pages will seem like filler.
2) The following items should be included in the report:
   a. Introduction to the problem addressed by the paper
      i. Why is it important?
   b. Brief outline of paper
      i. Discuss the problem at hand
      ii. Describe the approach
      iii. Describe the results, including any validation
   c. Your critique (know that there is no “right” answer”)
      i. What do you like about the paper?
      ii. What do you dislike?
      iii. What would you do differently?
   d. Grading
      i. Organization
      ii. Grammar
      iii. Clarity of logic
3) See me if you need suggestions for papers, but only after trying to find a paper yourself.
